**Able Information Technologies, Inc.
Awarded
Cooperative Educational Services (CES) Contracts**

Belen, NM: Able Information Technologies, Inc., (www.ableinc.com) a provider of integrated technology solutions for the past 15 years and a top E-rate provider, announced today that it has been awarded contracts with The Cooperative Educational Services (CES) of New Mexico. These new contracts cover Network Integration and Support Services, and Telecommunication Systems. Under these contracts, Able provides products from industry leaders including Cisco, Toshiba, and HP ProCurve, as well as ancillary items such as cabling and UPS power protection.

CES (<http://www.nmedu.org/>) is a member-owned agency that operates under a Joint Powers Agreement authorized by the New Mexico Department of Finance and Administration. Their members include two-year colleges, universities, charter schools, state schools, BIA institutions, and all of New Mexico's public school districts. CES carefully screens top-rated vendors and awards contracts only to those who have agreed to provide the best pricing, terms and conditions. Its mission is to provide leverage in the acquisition of required services, supplies, and equipment for its members.

"I am delighted about adding CES to our already existing contracts, including ones awarded by TCPN, and Mohave Educational Services Cooperative", said Brandon Ames, President and CEO of Able. Mr. Ames added that "These new contracts are further proof of our quality work and exceptional customer service." Mr. Chris Soiles, Able's General Manager in New Mexico, stated that "the new CES contracts make it easier and more economical than ever before, for our educational customers in New Mexico, to procure IT related products and services."

About Able Information Technologies, Inc.

Able is a Chandler, Arizona-based provider of complete technology solutions for commercial, government and educational organizations, with an office in Arizona and a new one in Belen, New Mexico since November of 2007. Since 1993, Able has been providing solutions for clients to solve their current and future technological challenges. These solutions allow clients to grow their business and expand their organization's vision in partnership with the Southwest's leading IP and networking solutions provider.
