Able Information Technologies Earns Cisco Recognition

(December 4, 2006, Chandler, AZ) - Able Information Technologies, Inc. has achieved dual honors from Cisco Systems, Inc., recertifying as a Cisco Premier Partner while also qualifying for the Advanced Unified Communications Specialization. This news comes at a time when Cisco Systems has been raising the standards for partner applications to ensure optimal customer service and technical expertise.

The Premier Partnership with Cisco requires the completion of sales and technical training as well as the establishment of credibility through customer surveys. The Cisco Advanced Unified Communications Specialization recognizes partners for their knowledge and expertise in selling, designing, installing, and supporting a comprehensive Unified Communications solution. To qualify for the specialization, Able technicians and Account Managers passed rigorous tests covering a full range of Cisco communications systems.

Advanced Unified Communications is a recent addition to the Cisco array of specializations, representing a complete portfolio of Internet Protocol (IP) communications products and services. Don Proctor, Senior Vice President of Cisco's Voice Technology group, states, *"Cisco Unified Communications is about finding the right person the first time. Our Unified Communications system integrates email, instant messaging, voice messaging, telephones, calendaring applications, Web collaboration, even video. Such capabilities lower the barriers to virtual collaboration, helping speed decision making, reducing communications bottlenecks, and boosting overall employee and organizational efficiency."*

Able Information Technologies is well known throughout Arizona for implementing end-to-end technology solutions designed to meet current needs while anticipating future growth. Brandon Ames, President and CEO of Able stated, *"We look forward to the expanded opportunities to serve our customers afforded through the Cisco Channel Partner and specialization programs."*
