## **Emergency Communication Links Upgraded by Strategic Technology Communications and Able Information Technologies**

### **Valley Technology Firms Tapped to Provide Critical Systems for Arizona's Emergency Responders**

(September 13, 2006, Chandler, AZ) - Strategic Technology Communications, Inc. (STC) and Able Information Technologies, Inc. (Able, Inc.) recently completed the installation of backup communication links for 92 emergency responders in Arizona. The Arizona Department of Health commissioned the project with a grant from the Department of Homeland Security for emergency response and preparedness. The sites involved are primarily healthcare facilities – hospitals and clinics – as well as tribal police headquarters on reservation land. All 92 installations were completed between July 1 and September 1, 2006.

At each site, the existing backup system was replaced with a satellite dish and network connections to provide redundant internet communication links. Remote testing monitors the networks' status daily and alerts STC to potential problems, so the system can be maintained in a constant state of readiness. "The Department of Health called us because of our State Carrier Contract," stated Debbie Long, President of STC, "and because of our experience working with state agencies and local governments to provide wireless connectivity in rural areas."

STC and Able are scheduled to implement 76 new installations between September 25 and December 1, 2006.

#### **About Strategic Technology Communications, Inc.**

Established in 1999, Strategic Technology Communications, Inc. (STC) is a telecommunications company located in Chandler Arizona. STC offers creative, quality solutions to the ever increasing need for affordable bandwidth. In the few short years that STC has been providing enterprise-level telecommunications infrastructure, they have gained the experience and reputation to qualify as one of only seven providers awarded the Arizona State Carrier Contract.
